FREEDHOME

Free to...

Caccaro has always stood out in the design-furniture market for its highly innovative character, and today proposes a new conception of modern living, which focuses on the individual, with his/her tastes and peculiarities.

Free to....

- **Live** the home to the full, in a functional and unlimited way;
- **Look** at the walls of the home in a new way;
- **Reinterpret** the concept of "storage" to overcome the old idea of "wardrobe";
- **Write** your own story, interpreting all the home environments according to individual tastes and requirements;
- **Mix** styles, materials and colours to create unique environments, made like a tailored suit (with no additional costs);
- **Be** the real protagonists of trends and not just followers.

Freedhome by Caccaro allows all this.

A revolutionary storage concept makes it possible to completely re-interpret home environments; a wall is no longer just a simple flat surface which supports the structure of the house, but becomes a white canvas, a vertical space to be personalised by **exploiting**, according to individual needs, **the unexpressed potential of its storage space**.

Freedhome completely overcomes traditional furnishing schemes, based on the concept of separate and distinct environments; its modules, thanks to innovative functional elements and to complete dimensional adaptability, make **Freedhome** totally flexible, able to furnish all home interiors, from the kitchen to the bedroom, the living area and the service areas.

New "*Made in Caccaro*" total living collection blends with a clean and rigorous design, in which the integrated lighting also becomes the protagonist, transforming domestic space into pure emotion.

Freedhome is also respect for the environment. Eco-sustainability and attention to health have always been part of Caccaro's DNA: all products are finished with special water-based paints for domestic environments in which well-being is a crucial component.
