## SIDEVIEW

### Il mobile contenitore diventa separé

Caccaro presented an innovative interpretation of home space, revolutionizing the concept of traditional storage unit. **SideView collection – Monica Graffeo's design** - with its soft and sinuous lines, rounded edges and timeless design, plays lead role in interiors, from the kitchen to the living area, entrance and night area.

The Sideview collection goes beyond the design furniture concept of satisfying storage needs and, thanks to an integrated “open wall” becomes a furnishing element for those who want to make their home one of a kind, giving interiors a personal touch, dividing or creating different degrees of visual transit.

The back of the integrated wall, available in a range of different materials and finishes can perform various functions: e.g., in an entrance, it becomes a practical clothes hanger, while in an open space it can separate the lounge from the kitchen, also becoming a practical TV stand; endless solutions to free your own creativity.

SideView also offers a broad choice of storage units – SIDE - with different finishes, measurements and heights – available in floor version, with feet, and suspended, to satisfy different requirements, even in the smallest spaces.

With this new multifunction collection, Caccaro is in the forefront in researching innovative solutions to make every home environment a one-of-a-kind and functional place.
