

New collection of Caccaro beds for customizable spaces

The constant research of Caccaro in the creation of unique living spaces led to the reinterpretation of the night area with an innovative collection of beds, which comes from a simple intuition: separate the headboard from the bed frame and then freely combine them in multiple solutions.

Many possible combinations of fabrics, dimensions, elements and accessories create proposals with a strong identity, which can satisfy a wide range of aesthetic and functional needs. These are perfectly blended with all furnishing elements of the new system Wallover® and of the iconic system Freedhome®

The night area becomes a space rich in new “on-demand” design suggestions, where also the lighting is the main character in a game of full-empty, soft-rigid, storage and not elements. In this way it is possible to make room to new ideas, fantasy and the freedom to design, even from home thanks to the online consulting and design service, which is available at the following link for free (<https://www.caccaro.com/progetto-gratuito.html>).

Sensorial experience, rhythm and “self-expression” are the fundamentals pursued by Caccaro to develop innovative design systems, which are distant from the passing trends. On the contrary, they allow to “dress” the house with a tailored suit without giving up to the practicality and functionality.

Bishape (Design Monica Graffeo)

Dimensions (mm): 1600 - 1800 x 1900 - 2000 – 2100

The headboard and the bed frame live on their own and the headboard itself consists of two shapes that can be freely combined.

Circle-Circle, Circle-Rectangle and Rectangle-Rectangle: each combination defines the personality of the bed and it redraws the design both in the double and in the single version.

The choice of the bed frame and of the upholstery of every shape increases the possibilities of customization; the seam placed in the middle of the circle or of the rectangle creates an elegant graphic sign, which plays with the colour and the wall surface until it turns into a real painting.

The dynamic profile of Bishape becomes even more unique by adding on the sides an original lighting system, which can be lacquered in all the colours of Caccaro palette. Thanks to an innovative mechanism installed in the back of the headboard, which was developed by the R&D department of the company, each support can rotate 90°. The movement is extremely fluid and quiet, it starts with a slight push of a finger and then it stops automatically. The round lampshade can be lifted to move the light where needed.

The two cushions of the headboard can be upholstered in several fabrics, that match, either in harmony or contrast, the matt lacquered finish of the Ring bed frame or the upholstered of the Box bed frame.

Combinable bed frames:

- Aluminium Ring in matt lacquered or with fabric covering. Double or French version.
- Upholstered box for double bed with or without container.

Let'space (Design Caccaro)

Dimensions (mm): 1600 - 1800 x 1900 - 2000 - 2100

A bed that highlights the tailoring, strength point of all Caccaro's proposals. A dimensional customization to the millimetre, which is possible thanks to the 4.0 industry model followed by the company.

Let's space headboard can be extended on the wall: from corner to corner (in niche) or in the middle.

The headboard, that becomes almost a boiserie, offers thanks to its length a 13 cm wide compartment, where photos, books, magazines and much more can be stored. On the back of the headboard it is possible to install a back led that spreads a soft light.

A swiveling lacquered small table can be added to the sides to offer an additional practical support surface.

Combinable bed frames:

- Upholstered box with or without container.
- Aluminium Ring in matt lacquered or with fabric covering. Double or French bed.
- Ring with matt lacquered container

Groove (design Monica Graffeo)

Dimensions (mm): 1600 - 1800 x 1900 - 2000 – 2100

It's Groove that starts the restructuring process of the bed. Groove is the multifunctional aluminium bar that can be used as headboard, too. The position on the wall, the accessories and the several combinations with the bed frame create always new solutions.

Groove bar can be a practical shelf useful for storing everyday items as well as becoming an additional lighting source for the night area. It can be equipped with two LED-bars, on the top or on the bottom, that spread a soft and cozy light creating a delicate effect on the wall surface. Thanks to four Bluetooth stereo amplifiers it can be easily connected to tablets and smartphones.

As shown in the picture, the bar is completed with two shelves, available in matt lacquered or in essenza, which act as night table. In this example Groove is combined with "Box" upholstered bed frame, available in the Caccaro fabric range.

Bar, shelves and bed frame: every element can be customized choosing a different finish and creating an infinite game of matches and contrasts. Thanks to the "Box" option, the bed can become a valid allied to create additional storage space.

Curved lines are in harmony with the sharp drawing of the bar. The padding creates a distinctive ergonomic profile. Thanks to the practical zipper "Zip", the cushions are fastened on the lower side of the bar and play with the position chosen for the bed frame.

The configuration that combines Zip cushions with Groove bar is called Groove Zip.

Groove bed system composition, in summary:

- Groove multifunctional bar.

Is combined with:

- Aluminium Ring in matt lacquered or with fabric covering. Double or French version.
- Upholstered box with or without container.

Accessories of Groove bar:

- Zip cushions- Groove Zip.
- Run cushions- Groove Run.
- Shelves.

Ajar (Design Monica Graffeo)

Dimensions (mm): 1600 - 1800 x 1900 - 2000 - 2100.

Upholstered bed whose name comes from the half-open fissure, i.e., “ajar”, which “cuts” the cushions that characterize the headboard. A soft line, two strong graphic signs, that create an original drawing, extremely clean and distinctive.

The opening reveals a deep pocket suitable for storing everyday items, that can be useful when relaxing.

Toffee (Design Caccaro)

Dimensions (mm): 1600 - 1800 x 1900 - 2000 - 2100.

Toffee is essential softness, a hug that envelops and welcomes with the abundance of its curved lines.

The corner formed by the union between the headboard and the bed frame, the headboard profile given by the upholstering and the precise elegance of the seams are well-finished details, which characterize its soft essence.

Filesse (Design Caccaro)

Dimensions (mm): 1600 - 1800 x 1900 - 2000 - 2100.

Filesse is a bed, whose strength point is the elegance. Being faithful to a minimalist style, its proportions and finishes have been completely redesigned.

The peculiar “S” profile creates a curved surface, that follows the natural back posture.
